

## Student Insurance

While the Toombs County School System takes appropriate measures to ensure the safety of students, accidents do occur. The Toombs County School System does not provide accident medical insurance coverage for students. This means that the guardian(s) are responsible for any bills from a school related injury to their child.

As a service to parents and their children, information about a variety of affordable insurance programs is being made available and parents are encouraged to obtain such insurance for them, whether as the only insurance, or to help meet deductibles on existing insurance. Parents are reminded that insurance is required for student-athletes and proof of insurance must be presented for eligibility. (A completed application is not considered proof of insurance. A copy of the insurance card showing coverage should be submitted with the athletic packet.) The Toombs County School System is not a provider of insurance, nor does it sponsor nor endorse any particular student insurance program.

Distribution of this information does not constitute an endorsement of any particular student insurance plan. The Toombs County School System is not being compensated in any way for distributing the information, which is being provided for informational purposes only. Any decision whether to purchase insurance must be based upon the guardian(s) own assessment of the risk of injury or illness and the adequacy of the plan to meet their needs in the event of a covered illness or injury.
