

Asbestos Notification

This is to inform all persons visiting, working in, or attending classes in a Toombs County School Facility that the Toombs County School System has been inspected for asbestos containing materials. A management plan has been developed which addresses the removal of such materials from or the management of known contaminated areas.

It is important to note that not all asbestos containing material needs to be removed from said areas to make them safe to occupy or work in. Once such material has been identified, a program can be implemented to ensure that the material is maintained in good condition and that appropriate precautions are followed when the material is disturbed for any reason.

Anyone who desires to review or retain a copy of this management plan can do so at the Toombs County Board of Education. Persons desiring copies of this plan for their own use may do so by paying the cost of reproduction, which is twenty-five (\$.25) per sheet.
